# EVERY ALL-AMERICA GLAD IS TESTED AT 30 TRIAL GARDENS

ONLY A TRULY ALL-AMERICAN  
CAN USE THE  
ALL-AMERICA  
EMBLEM

LOOK FOR IT

Some glads grow well in cool  
Canada. Some glads grow  
well in Florida. Some are at  
home in Holland, and some  
prefer the Mid-western United States. Most failures  
of home gardeners are due to getting hold of glad  
varieties not suited to their climatic and soil conditions.

***But some varieties of glads do well every-  
where!*** AAGS was formed as a non-profit  
organization of glad lovers—commercial and  
amateur alike—to thoroughly test new varieties  
and to pick out those which seem to grow  
superlatively well in ALL parts of the United  
States and Canada.

The map shows where the test gardens are located.  
The experienced judgment of thirty judges  
gives you your best assurance of dependable  
varieties.

The All-America Selections are each patented  
to insure control of bulb quality, and are sold by  
all reputable dealers at uniform prices—the  
lowest ever for new introductions.

## FOUR RUFFLED BEAUTIES

**MAYTIME**—A home gardener's "must" and a wonderful arrangement flower with striking color contrast. Grows 66 inches tall, opens 10 florets, blooms in 70 days. Show class 462. (Plant Pat. Pending.)

**CARIBBEAN**—Unusual color and vigorous health. Precise formal placement, with medium size florets on a tall plant. Show class 376. Blooms in 70 days. (Plant Pat. Pending.)

**APPLEBLOSSOM**—Creamy white floret with pink corona, giving a delicate pink effect. Easy grower, healthy, and very early (blooms in 65 days). Show class is 460 and this is a home gardener's delight. (Plant Pat. 1517.)

**ROYAL STEWART**—The first AA selection and the best of the reds. Show class 450, blooms in 80 days. A dependable grower, producing tall, formal spikes. Especially fine in hot weather. (Plant Pat. 1339.)

## CULTURE OF GLADIOLUS

AAGS recommends these steps for growing glads:

- (1) Open package at once and store bulb in cool dry place.
- (2) Plant at intervals of 10 days from last killing frost. Early plantings can stand moderate frost.
- (3) Plant in open sunny place, in bed or row, and in any well drained soil.
- (4) Plant bulbs 5 inches deep, at least 4 inches apart. Use any good commercial fertilizer, but do not put it in contact with the bulb.
- (5) Glads like plenty of water, especially when bud is forming.
- (6) When cutting, leave 4 leaves to mature the bulb.
- (7) Thrips are insect pests of glads. For complete control, use DDT dust or spray every 10 days.
- (8) Some growers soak bulbs in Lysol solution for 2 hours before planting and plant wet. Use  $1\frac{1}{4}$  teaspoons Lysol to 1 gallon water.
